22 MR. SHANKS: Donald E. Shanks.

23 Statement next?

24 MR. LUPTON: Yes. Floor is yours.

25 MR. SHANKS: Our big concern on the nuclear

0019

1 waste issue isn't so much the repository; it's the
2 transportation, getting it there, and the possibility
3 that it will open the nuclear industry up wide again as
4 it was when this first started going.

5 And I understand that this particular event
6 isn't necessarily linked to that, but I think they
7 should be linked. I would like to see the
8 transportation issues worked out.

9 In particular I think it's a mistake to even
10 talk about unloading it in Caliente or close to it. I
11 think the railroad should go clear through to the site
12 and work out those problems.

13 Do you have any other comment?

14 MRS. SHANKS: I can't think of any other
15 comments.

16 MR. SHANKS: I think that's my main comments.
